Technische Informationen

Our PUxl wall distributor „PROFESSIONELL MEGA“ convinces with its increased safety and practical handling - great importance was naturally attached to these factors.

Very high-quality plug devices - from the manufacturer MENNEKES, combined with the absolutely safe circuit breakers and professional wiring, offer the necessary safety and optimal protection.

The transparent and impact-resistant polycarbonate cover, behind which the protective switching devices are installed, protects against weather-related influences. The cover stands out due to its particularly high strength - it remains constantly resilient, especially with extreme temperature differences.

Our PUxl product PUX014 gets the necessary weather resistance and robustness through the exclusive use of non-rusting materials.

All external metal parts and cover screws are made of these non-rusting materials. All MENNEKES sockets also offer additional protection against the effects of the weather, because they have self-closing hinged covers made of impact-resistant polyamide 6 - this means that outdoor use is optimally guaranteed.

These excellent properties of the PUxl wall distributor "PROFESSIONELL MEGA" stand for absolute protection and security - combined with the comfortable handling, the PUX014 is indispensable.

Simply ideal for bringing electricity to where it is needed - whether indoors or

outdoors.

Our PUX014 is verifiably MADE in GERMANY | Exactly?

- MADE in HESSE –

- Manufacturer Part Number / SKU: PUX014
- EAN/GTIN: 4059981000123
- Suitable and intended: fixed wall mounting as intermediate security
- Special feature: well-known brand manufacturers
- Fuse manufacturer: ABB
- Manufacturer of the sockets: MENNEKES
- Entry:
 - Cable gland M32 above
 - Blind screw connection M32 below
- Exit:
 - 1x CEE socket 32 ??amps, 5-pin, 400 volts, 6h
 - 1x CEE socket 16 amps, 5-pin, 400 volts, 6h
 - 4x Schuko socket 230 volts
- Protection via:
 - 1x miniature circuit breaker 32 amps, 3-pin, C-character
 - 1x miniature circuit breaker 16 amps, 3-pin, C-character
 - 2x miniature circuit breakers 16 amps, 1-pole, C-character
- FI circuit breaker: Type A, 40 amps, 4-pole, IFN: 0.03 A across all outlets
- Degree of protection: IP54
- Protection class: II
- Rated Load Factor (RDF): 0.6
- Temperature resistance: from -25°C to 40°C
- Plastic housing in gray
- Height: 43cm
- Width: 26cm
- Depth: 19.5cm
- Weight: 4.8kg

- Material: plastic (ABS)
- Housing color: grey
