

PUXl wall power distribution box "TINY" wired

Allgemeine Informationen

Products_Model	PUX020
EAN	4059981000192
Producer	AFB eSolutions
Producer-Model	PUX020
Producer-Typ	
min. Order	
Class	Installationskleinverteiler

Technische Informationen

The „TINY“ wall distributor is ready to go - thanks to ready-to-connect wiring and pre-assembly.

PUXl „TINY“ - the name says it all - because our small, compact wall distributor can be placed almost anywhere and brings the established PUXl power with it.

Our PUX020 „TINY“ - like all our PUXl wall distributors - is intended as an intermediate fuse for fixed wall mounting - e.g. for the basement, garage, carport, outbuilding or pool house.

Our PUX020 „TINY“ meets almost all requirements and can be used both indoors and outdoors thanks to its temperature resistance of - 25° C to + 40° C.

- Manufacturer Part Number / SKU: PUX020
- EAN/GTIN: 4059981000192
- Suitable and intended: as intermediate security for fixed wall mounting
- Special feature: very compact
- Fuse manufacturer: ABB
- Socket manufacturer: PCE
- Entry:
 - Cable gland M25 above
 - Blind screw connection M25 below
- Exit:
 - 1x CEE socket 16 amps, 5-pin, 400 volts, 6h

- 2x Schuko socket 230 volts
- Protection via:
 - 1x miniature circuit breaker 16 amps, 3-pin, C-character
 - 2x miniature circuit breakers 16 amps, 1-pole, C-character
- Degree of protection: IP54
- Protection class: II
- Rated Load Factor (RDF): 0,8
- Temperature resistance: from -25°C to 40°C
- Height: 43.1 cm
- Width: 25.5 cm
- Depth: 22.3 cm
- Weight: 2.5 kg
- Material: plastic (ABS)
- Housing color: grey

POWER „P“ is the product of the electrical voltage „U“ and the electrical current „I“.

Our compact PUXl wall distributor „TINY“ was designed for the highest demands and the smallest of spaces - despite its small size, it has a lot of PUXl POWER and is intended for use in trade, on construction and assembly sites, as well as in agriculture and industry.

The PUX020 „TINY“ is perfect for private use - precisely because of its compact design.

Convince yourself of its powerful PUXl POWER!

SECURITY | PROTECTION and HANDLING:

With our PUXl wall distributor „TINY“, increased safety, user-friendliness and optimal use of space are of course of the utmost importance.

For protection and safety, particularly safe circuit breakers and extremely

high-quality plug devices were used and installed in our model PUX020 „TINY“. Of course, there is also the professional wiring, which is why the wall distributor PUX020 „TINY“ is ready to go right away - completely pre-assembled and wired ready for connection.

Additional safety is ensured by the protective switching devices installed behind a transparent and impact-resistant polycarbonate cover to protect against the effects of the weather.

Thanks to its exceptionally high level of robustness, this protective cover defies even extreme external influences. In addition, all built-in protective switching devices have touch protection according to DIN VDE 0106 PART 100.

In addition, all external metal parts and cover screws are produced and installed from non-rusting materials for optimal outdoor use and to ensure the weather resistance and resilience of our PUXl product PUX020 „TINY“. All sockets are equipped with self-closing hinged covers made of impact-resistant polyamide 6.

All of these individual components combined make our PUXl wall distributor „TINY“ unbeatable.

The PUX020 wall distributor „TINY“ is individually tested and made in GERMANY.

Test report available on request.
